## Summary

I'm an independent web developer who is passionate about bringing client's visions to life. Since beginning my web development path in 2017, I have managed over 15 projects for a diverse client base, which includes 4 mega projects .

I'm proud that my web development work has helped my clients to grow their businesses and generate more revenue. For example, after revamping the website of a Leicester-based clothing company, my client experienced a 312% increase in the sale of footwear.

My strongest skill is my creativity. Being able to gather client's requirements and translate those into an engaging, effective and unique website is what has helped me obtain over 500 positive Trustpilot reviews.

If you would like to know more about my web development services, please take a look at my website, which is detailed below. Alternatively, check out images of some of the websites I have created in my experience section.
